(54) Title: A METHOD AND SYSTEM FOR PROCESSING SOUND SIGNALS

(57) Abstract: The invention describes a method for processing sound signals for a surround left channel (S_L) and a surround right channel (S_R). Thereby, a continually varying delay between the resulting signals of the surround right (S_R) and surround left channels (S_L) is generated. Furthermore the invention describes a delay management unit, a sound processing system, an acoustic system comprising such a sound processing system, a mixing unit for such an acoustic system and a studio system comprising such a sound processing system.
